Additive for matte finish of KOSTER UTC and UTC-LT

Features

KOSTER Matte Additive is a micronized polypropylene polymer additive that provides a matte finish to KOSTER UTC and UTC-LT topcoats, producing a uniform low gloss surface. KOSTER Matte Additive also provides some non-slip properties. Its low density and insolubility will reduce or eliminate settling and provide optimum performance for KOSTER UTC and UTC-LT.

Fields of Application

KOSTER Matte Additive is recommended where high shine or high reflection of the cured coating are not desired, such as bathroom stalls, offices, and wall systems.

Application

KOSTER Matte Agent is pre-dosed in KOSTER UTC. Apply the KOSTER UTC with the KOSTER Matte Additive according to the application instructions on the data sheet of KOSTER UTC.

Packaging

Pre-dosed at plant

Safety

Consult Safety Data Sheet. Always wear proper personal protective equipment when handling this product.

Limited Warranty

KOSTER warrants that its product shall be in accordance with the specifications published in the current revision of the products data sheet. KOSTER covenants that in the event any of its products fail to meet their published specifications, KOSTER shall replace those products proved to be defective. KOSTER shall not be responsible for any incidental or consequential damages due to the breach of its warranties. Notwithstanding the foregoing, KOSTER's sole liability hereunder shall not exceed the cost of the defective product originally purchased. EXCEPT AS SET FORTH ABOVE, KOSTER MAKES NO OTHER WARRANTIES EXPRESS OR IMPLIED AND MAKES NO WARRANTY AS TO THE MERCHANTABILITY OR FITNESS OF THE PRODUCT FOR A PARTICULAR PURPOSE. THERE ARE NO WARRANTIES WHICH EXTEND BEYOND THE DESCRIPTION ON THE FACE HEREOF. The user must determine if the product is suited for the intended use and the user must bear the risks and liabilities associated with it.

The information contained in this technical data sheet is based on the results of our research and on our practical experience in the field. All given test data are average values which have been obtained under defined conditions. The installer is responsible for the correct application taking into consideration the specific conditions of the construction site and the final results of the construction process. This may require adjustments to the recommendations given here for standard cases. Specifications made by our employees or representatives which deviate from the specifications contained in any Company literature may not be relied upon in the absence of written confirmation from the Company. The installer must comply with all testing, technical requirement, guidelines, and industry customs at all times. The terms, conditions, and limitations contained herein. This guideline has been technically revise; all previous versions are invalid.
